

# Extra Horse Power

## For Top Performance

**Stable-lyx®**  
Equine Supplement

*Ensures daily intake of trace minerals and vitamins*

### 100% Balanced Nutrition

- All-natural protein
- High quality micronutrients

### Improved Conditioning

- Helps develop greater stamina
- Can help improve conception
- Improves hair coat and appearance
- Assists in developing stronger foals at birth
- BIOPLEX® and extra biotin for improved hoof growth and durability

### High Energy

- Nutrient dense
- No non-nutritive binders or fillers

### Palatability

- Molasses-based low-moisture block
- Dissolves with licking
- Ensures consistent intake

### Controlled Intake

STABLE-LYX® is designed to limit intake to maximize the effectiveness of supplementation at a cost you can afford.

### Labor-Saving Economy

STABLE-LYX® is formulated for self-feeding in pastures or open pens. The durable container prevents waste from wind, rain, snow or trampling. Several container sizes are available.

**ClariFly**

STABLE-LYX® is now available with ClariFly® for the prevention of adult house flies and stable flies from developing in and emerging from the manure of treated horses.

ClariFly® is a registered trademark of Welmark International.

### How to Feed Stable-lyx®

STABLE-LYX® Brand Supplement is designed for self-feeding to all classes of equine.

Place containers in areas that achieve desired supplement intake. Provide one container for every three to 20 horses. A minimum of two containers may be necessary in each pen or pasture to assure consistent intake and proper accessibility.

To introduce or encourage intake with naive animals:

1. Place in areas where animals loaf or congregate.
2. Remove cover and apply a handful of loose salt, grain, texturized or pelleted feeds to the surface of the block
3. Or apply a small amount of water to the top of the block after scraping the surface

Equine will typically consume between 0.25 and 3.0 pounds per-horse, per-day. Self-fed consumption will depend on the size and age of the animal, the number of equine per container, as well as quality, source and availability of forage. Always provide free access to clean, fresh water.

**CAUTION:** Equine must be managed so that consumption of this block does not exceed three pounds per-head, per-day.

### TYPICAL NUTRIENT ANALYSIS

Crude Protein, min .....	12.0%	Copper, min .....	250 ppm
Crude Fat, min .....	5.0%	Iodine, min .....	8.8 ppm
Crude Fiber, max .....	3.0%	Manganese, min .....	880 ppm
Calcium, min .....	1.5%	Selenium, min .....	0.7 ppm
Calcium, max .....	2.0%	Zinc, min .....	1,320 ppm
Phosphorus, min .....	1.0%	Vitamin A, min .....	30,000 IU/lb
Salt, min .....	12.0%	Vitamin D3, min .....	5,000 IU/lb
Salt, max .....	14.4%	Vitamin E, min .....	250 IU/lb
Magnesium, min .....	1.0%	Biotin, min .....	10 mg/lb
Potassium, min .....	2.0%	Thiamine, min .....	30 mg/lb
Cobalt, min .....	8.8 ppm		

BIOPLEX® is a registered trademark of Alletch®

Contains **BIOPLEX®** organic trace minerals.
